VACUUMS

KleanRite Vacuums

The KleanRite™ K² and K³ line of vacuums feature strong, solid construction and cutting-edge innovations such as an electronic keypad with LED indicators that monitor the performance of the main and HEPA filters.

Designed to meet a wide range of industrial cleaning challenges, the two-motor K² comes with a 50 liter (13 gallon) collection container, while the K³, three-motor machine, is available with 50 or 100 liter (26 gallon) collection capacities. Extremely ergonomic, these vacuums feature a modular design for easy modifications, upgrades and servicing. The K² and K³ can be equipped with multi-stage filtration, including an optional HEPA filter to capture 99.97% of particulate, down to and including 0.3 microns.

Features & Benefits

Manual filter shaker to quickly clean the main filter, keeping performance high.

Oversized handle for easy push or pull transport.

Accessory storage tray and cable holder.

Liquid and Solid Level LED sensors (100 L machines only) that automatically shut-off the machine when maximum capacity is achieved.

KleanRite™ Vacuums

KleanRite™ K2 Vacuum		
Power @ 60 HZ	2000	W
	2.68	HP
Waterlift, max	83.1	in. H2O
Airflow, max	198	CFM
Current, max (120V)	14.5	amps

KleanRite™ K3 Vacuum		
Power @ 60 HZ	2400	W
	3.22	HP
Waterlift, max	71.5	in. H2O
Airflow, max	270	CFM
Current, max (120V)	15.8	amps

KleanRite™ K3 Vacuum		
Power @ 60 HZ	3000	W
	4.2	HP
Waterlift, max	90	in. H2O
Airflow, max	314	CFM
Current, max (220V)	13	amps
