

KleanRite

VACUUMS with Reverse Flow Technology

KleanRite Vacuums

Reverse Flow Technology is the key to new line of vacuums offered by Kut-Rite. The patented KleanRite™ vacuums are available in two different models. Both models are equipped with self cleaning Reverse Flow Technology and are capable of operating wet or dry.

The KleanRite KRV25 is the most powerful and versatile model available generating up to 300 CFM. The KRV25 comes equipped with standard features including: 110V/220V operation, quick release debris removal tank, an ergonomically designed mobile cart and an incredible 2 year limited warranty. The KRV15 has many of the same features including Reverse Flow Technology. Both models are available at the WOC 2009.

Features & Benefits

Reverse Flow filter cleaning technology provides continuous suction.

2 Year Limited Warranty

Wet/Dry Operation

Two-stage turbines and bypass motors deliver high flow volume and pressure.

Auto shut-off when debris tank is full, KRV15 model
Ergonomically designed debris removal.

Sturdy steel frame cart with stainless steel canister.

Quiet motor technology generates low noise rating below 67 d(B)A
PET-fleece filter cartridge is washable for long life
